

# Aberystwyth and District Beekeepers Association

## **The Yellow-legged hornet (“Asian hornet”)**

Paul Pearce (Vice-Chair, Welsh Beekeepers Association)

7.30pm, January 21<sup>st</sup>, Waunfawr Community Hall, SY23 3PN

**The Asian Hornet is an invasive species which arrived in tiny numbers in the UK in 2016 and is now spreading fast – it will be endemic in Wales within 2-3 years.**

It is aggressive and a profoundly dangerous threat to bees and pollination and, with an unpleasant sting, us all.

Beekeepers and all outdoor workers need to know about this insect: its locations, nests, spread, and counter measures. Paul Pearce (WBKA) will give a progress report on what has been done, and what we should all do now.

**Free to attend!** A small donation (£1) secures tea/coffee and biscuits
