Tool Sharpening

Bring along your own neglected and blunt tools and discover how to give them a new lease of life.

4 October 2025 at

Denmark Farm, Lampeter

In our 'throw away' society it is often considered a waste of time to repair or restore old and broken tools and equipment. The skills for fixing and maintaining items are gradually becoming lost.

Help to reverse this negative trend and learn how to sharpen your own small and medium sized gardening and craft tools yourself.

Bring up to three of your own items that you would like to repair such as craft knives, secateurs, chisels, scissors, spades, axes, sheers, loppers & billhooks.

Tutors: Ryan Knight Fox & Peter Drake

£65 per person
